

## Energy Traders Europe and Czech Energy Association Sign Memorandum of Understanding to Strengthen European Energy Market Cooperation

Brussels, 30/03/2026

Energy Traders Europe and the Czech Energy Association (SE) have signed a Memorandum of Understanding (MoU) to strengthen cooperation and promote more open and efficient energy markets across Europe. This partnership brings together two organisations committed to transparency, efficiency, and well-functioning markets that deliver value for both consumers and businesses.

By deepening collaboration, the two associations aim to amplify the voice of market participants and contribute to solutions that support Europe's evolving energy landscape. The MoU reflects a shared commitment to advancing integrated, transparent, and secure energy markets, priorities that are central to Energy Traders Europe's Integrate by 28 Report.

**Barbara Maria Lempp, Chief Operating Officer of Energy Traders Europe, commented:**

"In today's turbulent times for the energy sector, cooperation between European and national associations is more valuable than ever. Our partnership with SE will strengthen the voice of market participants and help address current challenges. Czechia is an important energy player, and we are glad to work together in advancing integrated, transparent, and secure energy markets, as envisioned in our 'Integrate by 28 Report'."

**Josef Kotrba, Executive Director, Czech Energy Association (SE) added:**

"Functioning energy markets are a shared priority of our organisations."

The signing of the MoU reinforces the growing importance of cross-border collaboration in addressing the energy sector's most pressing challenges, including market integration, price volatility, and the transition to a low-carbon economy. Both organisations look forward to working together to shape a resilient and competitive European energy market.
